1/4" PLYWOOD	1/4" X 4' X 8'	009003

CDX Plywood is ideal for sheathing or structural covering over exterior studding, rafters, or subfloor under an underlayment. CDX Plywood is also versatile and is excellent for utility jobsite needs such as temporary steps, ramps or bridges. It also meets or surpasses building code requirements for fire safety, strength, and sound transmission. This Plywood is CDX graded meaning the “C” side has a more rough surface with visible knots and splits. The “D” side is even rougher with a lot more noticeable knots and splits when compared to C. The letter “X” indicates the kind of glue utilized in the production line to bond the plywood veneers.
