Curved Staircases have Pie Shaped Treads, each tread will probably have similar dimensions, Please provide the dimension for each stair tread so that we can manufacture it accordingly. Please provide as much support as you can with the stair treads such as staircase images and any dimensions that are required to fabricate the stair treads. Please allow two to six weeks for completion as custom templates are "made to order".

A paper template (minimum poster paper or cardboard thickness) of the stair tread with the carpet off, is required as not all staircase are squared and perfect. Please provide as much support as you can with the stair treads such as staircase images and any dimensions that are required to fabricate the stair treads. Please allow two to six weeks for completion as custom templates are "made to order".

BUSINESS TERMS:

Not all drawings are to size. The dimensions listed are as correct, actual size and shape of products may vary due to manufacturing and are subject to change without notice. . Follow all manufactures guidelines and recommendations as well as the highest and best building practices, respectively, for intended use.

CLAIMS:

Any product that falls below industry standards will be exchanged or replaced at no additional cost to purchaser. All defective claims must be made prior to installation of products. Seller accepts no responsibility for labor, or other loss, experienced by the buyer because of use of the seller's products.

SHORTAGES:

All shortages must also be made prior to installation of products. Inspection of products before installation is the responsibility of the customer.

CUSTOM MILLWORK:

Solid hardwood or softwood millworks and mouldings are manufactured in random lengths unless quoted to project specification. As lumber is a product of nature, variation in texture, color of grain patterns are natural & to be expected. Due to the natural growth differences in species, some are limited in lengths of boards available. Many hardwoods are usually 9'-12' lengths but come as short as 6' or as long as 16' dependent upon lumber availability. Random lengths orders may include a maximum of 15% short lengths from 3' to 6' and 85% in lengths from 7' to 16'. Specific Length orders are subject to lumber availability and subject to a 25% upcharge in price.

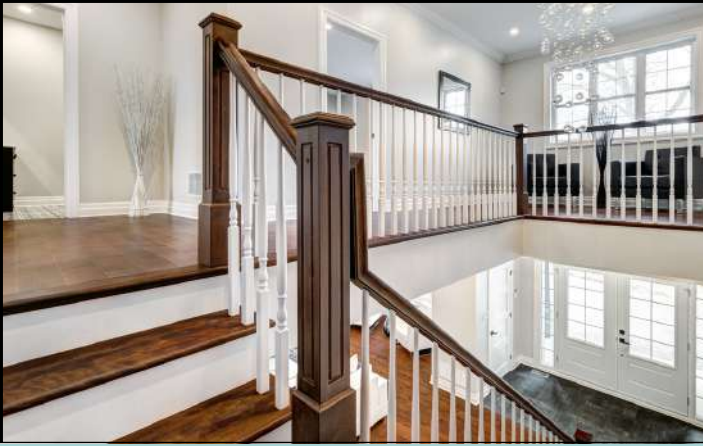

CUSTOM/SPECIAL ORDER:

A minimum of 50% deposit is required on all custom or special order products, no exceptions. All special order or custom order millwork are non-refundable or returnable once the order has been started in production. Some special order products may be returned or exchanged subject to a 25% restocking fee. All returns or exchanges must be returned in original package, no cut, dirty, painted, or wet material will be returned, any material returned for reasons other than quality will be subject to a 25% restocking charge.

STORAGE, HANDLING AND PREPARATION OF ALL MILLWORK:

Wood is hygroscopic, expanding as relative humidity levels increase and contracting when it loses moisture. Professionals refer to the relationship between wood and humidity as "equilibrium moisture content" (EMC). As the relative humidity in the environment increases, so does the moisture content in wood and the EMC so keep all wood away from the direct sunlight and water.

Being based in Houston, Unique Wood products and our clientele are somewhat familiar with moisture and the damage it can do to lumber, again we strictly recommend all millwork must be effectively and continuously protected from exposure to direct sunlight, ground contact and other similar elements. To prevent changes in EMC, millwork should be stored only in a dry, clean location and fully protected from water and high moisture. All millwork products must be "acclimated" to the environment by storing in the installation space for at least 3 days prior to installation to prevent bowing, splitting or gap formation.
